Profile Summary

Software Engineer with 5+ years of experience delivering scalable, high-performance solution across frontend and backend.Skilled in building distributed systems and APIs with NodeJS and ExpressJS,performant UI with Angular and TypeScript. Proficient at system design, cloud native architectures and driving the full software lifecycle from design to deployment and monitoring.

Technical Skills

- **Languages:** JavaScript, TypeScript,HTML,CSS
- **Framework & Libraries:** NodeJS, ExpressJS, Angular,Jquery
- **Database:** MongoDB, MySQL
- **Tools & Platforms:** Git, Postman, JWT, Confluence, Swagger, AWS (EC2, S3), Firebase, VS Code
- **System Design Concepts:** RESTful APIs, Microservices, Async Processing
- **Integration Technology:** MuleSoft AnyPoint Platform, MuleSoft AnyPoint Studio

Professional Experience

AdGlobal360 India Pvt. Ltd. (Hyderabad, Remote) August 2022 - Present
Engineer Delivery

- Design and implement **scalable REST APIs using Node.js and Express** for enterprise automotive digital platforms.
- Integrate **MuleSoft enterprise APIs** and external services to enable vehicle-related features including **dealer discovery, fuel locator, and smart parking services**.
- Collaborate with frontend teams to integrate **Angular applications with backend APIs**, improving data flow across the system.
- Contribute to documentation and architecture knowledge sharing through **Confluence**.
- Participate in maintaining high-availability backend services for **large-scale automotive client platforms**.

ValueCoders Services LLP (Remote) June 2021 - August 2022
MEAN Stack Developer

- Developed scalable backend APIs using **Node.js, Express, and MongoDB** for multiple web applications.
- Built **Angular frontend modules** and integrated backend services for full-stack delivery.
- Implemented **cross-platform push notification** systems using Firebase for Android, iOS, and web clients.
- Designed and implemented a **"Remember Device" (Trusted Device) authentication system** to securely bypass OTP verification on recognized devices, improving login experience and reducing authentication friction.
- Designed **multilingual questionnaire systems** supporting international users.
- Integrated **YouTube and Twitch APIs** to create analytics dashboards tracking video performance metrics.
- Improved frontend stability by diagnosing and resolving UI issues across modules.

TOPS Infosolution Pvt. Ltd. (Ahmedabad) January 2020 - September 2020
MEAN Stack Developer

- Built backend APIs using **Node.js and Express** for client applications.

- Integrated APIs with **Angular-based web interfaces**.
- Worked closely with frontend engineers to optimize data flows and resolve integration issues.
- Delivered multiple client-facing web application features.

MultiTech Solutions (Gandhinagar) July 2019 - December 2019
Angular Developer

- Developed responsive frontend components using **Angular, JavaScript, HTML, and CSS**.
- Integrated REST APIs to enable dynamic data-driven interfaces.
- Delivered solutions for **government and enterprise clients** in a startup environment.

Selected Projects

Automotive Digital Platform — Maruti Suzuki Rewards
Enterprise web platform enabling digital services for automotive customers.

Built and enhanced a scalable enterprise web platform for automotive customers, developing backend services using Node.js and Express, integrating MuleSoft APIs, and delivering key features like dealer service discovery, fuel locator, smart parking, and vehicle assistance modules..

Video Analytics Dashboard - Polar Ace
Web application for monitoring video engagement metrics.

Developed a web application to track and analyze video engagement metrics by building backend services integrating YouTube and Twitch APIs, implementing trusted device authentication to streamline logins, and enabling centralized dashboards for performance monitoring.

Sema Dashboard
Feedback survey system with a 5-point rating mechanism to capture and manage user responses efficiently.

Developed a feedback survey platform with a 5-point rating mechanism by designing secure RESTful APIs using Node.js, implementing authentication middleware for data protection, and integrating with an Angular frontend for seamless data interaction and dynamic rendering.

Drip Irrigation System platform
Built a farmer-centric Drip Irrigation System platform delivering real-time insights on government agricultural policies and loan schemes to improve decision-making and accessibility. Implemented REST API integrations in Angular to enable dynamic data rendering and efficient frontend-backend communication. Optimized UI/UX by resolving design issues and improving responsiveness, enhancing overall user experience.

Education

Rajiv Gandhi Technical University July 2010 – Jun 2014
Bachelor of Engineering | Computer Science Indore
